United Rentals®
Customer Equipment Solutions

CES MAINTENANCE AND INSPECTION PROGRAM

You can count on our network of service centers and factory trained technicians to inspect and maintain your equipment to the same standards as our over $20 billion fleet. Services include comprehensive inspection services, preventative maintenance, and minor/major repairs on site or in our shops.

Program Benefits

- Structure and visibility
- Reduced downtime
- Improved cost control
- Extended equipment life
- Protects your investment
- Catastrophic failure reduction
- Positive impact on your bottom line and culture

Safety & Compliance

- ANSI / CSA compliance
- Assists in preventing penalties and fines if inspections are not performed timely
- Jobsite and employee safety
- Proper detailed documentation and record retention
- Risk reduction

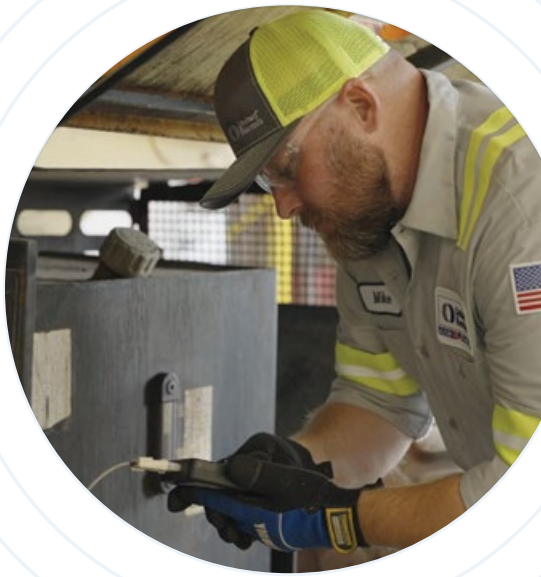

The United Advantage

- 5,500+ factory trained technicians
- 1,500+ convenient locations
- Auto scheduling of services
- Prompt superior service
- Latest technologies utilized
- Single source provider
- Factory direct parts availability

SERVICING YOUR EQUIPMENT LIKE IT'S OURS.

AERIAL EQUIPMENT INSPECTIONS
Frequent inspections per manufacturer's machine-specific guidelines and annual inspections every 13 months.

SCHEDULED PREVENTATIVE MAINTENANCE
Our proactive PM Services assist in keeping your equipment properly serviced at manufacturers' recommended intervals. Services can be fully customized to meet the needs of the equipment types within your fleet inventory.

PROACTIVE AUTOMATED SCHEDULING
Inspections and PM Services are proactively scheduled, performed, and tracked at the required predetermined intervals, utilizing the same proprietary operating systems we utilize to maintain our rental fleet.

TOTAL CONTROL®
View and manage your owned and rented equipment in one customizable portal. View service and inspection data, assign assets to worksites, set alerts, review invoices, customize reports, and benefit from many other features that help you efficiently manage your equipment.

REMOTELY MONITOR YOUR OWNED EQUIPMENT
With Telematics (GPS) installed, your equipment can be remotely monitored in Total Control in real time. View service intervals and alerts, location, utilization, usage, machine hours, geo-fences, battery voltage, etc. Customizable reporting and other valuable features will assist you in effectively managing your equipment. See your sales rep for additional details or a live demo.

For complete details contact your local Branch or our Customer Equipment Solutions Team (CESsupport@ur.com) and allow us to design a service program that fits your needs.
